visually inspecting the actuation of said plurality of electrical components from the location of said remote transmitter.

E
2. (Amended) A method as set forth in claim 1 including the step of performing diagnostic analysis upon the plurality of electrical components on the vehicle while actuating the electrical components with the remote transmitter.

X
10. (Amended) A method of actuating electrical components of a vehicle for performing diagnostic analysis on the electrical components, said method comprising:

programming an electronic control device on a vehicle with an actuation sequence for a plurality of vehicle electrical components;

transmitting a signal from a remote transmitter to a receiver aboard the vehicle;

relaying the signal to the plurality of electronic control device for beginning the actuation sequence of the electrical components in response to the signal from the transmitter; and

performing diagnostic analysis upon the electrical components while actuating the electrical components with the remote transmitter.

X
15. (Amended) An apparatus for performing diagnostic analysis upon electronic components of a vehicle, wherein said apparatus comprises:

a remote transmitter for transmitting an actuation signal;

Please add new claims 19 and 20.

SDD
19. (New) An apparatus as set forth in Claim 1, wherein said plurality of electrical components includes at least the brakes and at least some lights.

ca
20. (New) A method as set forth in Claim 10, wherein said plurality of electrical components includes at least the brakes and at least some lights.

21. (New) An apparatus as set forth in Claim 15, wherein said plurality of electrical components include at least a brake and at least some of the vehicle lights.
